

I am concerned that the implimentation of LPFM radio that would have priority over existing traslator FM stations like KVIP and K-LOVE, will make it impossible for me to receive those stations or a station like them with the type of music, news, and information that is available only on those stations. There are no local stations that have the same programing as KVIP and K-LOVE which I believe is good for our community in that it encourages good morals, proper behavior for all ages which promotes better, more upstanding citizens to improve standards in our community (less crime, domestic problems, etc.) I believe these things are of great public interest. LPFM stations would most likly be secular in programing because selling ads is thier form of income where as KVIP and K-LOVE are non-commercial, listener supported, so they are able to serve an audiance that most station can't. I ask that this be considered before making changes that would take this option away from the citizens that depend on you to help us maintain those services that make our lives more enjoyable. thank you
